DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not disclose or suggest "a conveyor belt for conveying the recording medium...satisfying a relation of $\gamma > \gamma_c$, wherein γ (mN/m) is a static surface tension of the recording liquid at 25 [degrees] C and γ_c (mN/m) is a critical surface tension of the conveyor belt" in combination with the remaining claim elements set forth in claims 1 and 11. Furthermore, the prior art does not disclose or suggest "a recording liquid for being ejected to a recording medium conveyed by a conveyor belt...wherein the recording medium satisfies a relation of $\gamma > \gamma_c$, wherein γ (mN/m) is a static surface tension of the recording liquid at 25 [degrees] C and γ_c (mN/m) is a critical surface tension of the conveyor belt" in combination with the remaining claim elements set forth in claim 6 and its dependent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lin et al. (US 5531818) and Nishino (US 7159963) disclose surface tensions and viscosity of desirable inks.
